OBJECTIVE

As a B.Tech student in Computer Science and Social Sciences at IIIT-Delhi, I strive to bridge the gap between technology and societal impact. By leveraging my expertise in programming languages like Java, Python, and C++ alongside my understanding of social systems and human-centric research methods, I have developed projects ranging from responsive web applications to operating system modules. My goal is to contribute to innovative, interdisciplinary solutions that address complex technological and societal challenges, fostering meaningful progress in both domains.
